

FOURTH INTERNATIONAL SYMPOSIUM ON BLOCK AND SUBLEVEL CAVING

15–17 October 2018 | Vancouver | Canada

SPONSOR AND EXHIBITOR OPPORTUNITIES

BACKGROUND

The growing popularity of caving methods around the world is largely due to the very low production cost and the intrinsic safety associated with the mining approach. It is often the only viable mining method for some of the lower grade massive orebodies that are becoming too deep for open pit mining.

Strategically, most medium and large mining companies are operating or planning to operate a caving mine. Codelco's El Teniente Mine in Chile and the LKAB's Kiirunavaara Mine in Sweden are among the largest and most famous caving operations in the world.

SYMPOSIUM THEMES

- Draw control/ material flow
- Caving mechanics
- Ground support
- Geotechnical monitoring
- Fragmentation
- Mine equipment
- Numerical modelling
- Planning and design of caving mines
- Preconditioning
- Seismic monitoring of caving mines
- Subsidence
- Caving mine closure

Cave mining has become one of the most research intensive areas of mining engineering in recent times. Mining companies need to be kept informed of the latest technological developments from caving research, and researchers require a regular platform to present their results and interact with industry practitioners.

The Australian Centre for Geomechanics looks forward to hosting the Fourth International Symposium on Block and Sublevel Caving in Vancouver in October 2018. This follows previous symposia held in Santiago in 2014; Perth, 2010 and Cape Town, 2007.

MARKETING

The ACG is undertaking a niche marketing campaign to promote this symposium to local and international professionals via:

- Internet marketing — promotion via the dedicated symposium website, ACG website and other mining event websites.
- Promotion of the event in the ACG newsletter that is distributed to almost 7,000 mining professionals worldwide.
- Regular email updates to the ACG's mailing list.
- Industry association.
- Direct mail campaign — event specific flyers, registration brochures and targeted electronic mail.
- Media support and coverage from reputable industry journals, magazines and newsletters.
- International and local exposure through the activities and support of key industry personnel.
- Regular communication with ACG underground mining event past delegates.

ACG UNDERGROUND MINING EVENTS

In 2002 the ACG held its first international underground mining event. Since then our underground mining events have addressed pressing technical industry topics, including: ground support, block and sublevel caving, mine fill, surface support and deep and high stress mining. The continued high attendance at our underground mining events and training courses illustrates that many worldwide mining companies find the event content, quality and interactive format to be of a high calibre, relevant and of real value and benefit.

Contact the ACG for a delegate profile and exhibitor lists for our past international underground mining events.

The ACG would be delighted to tailor a sponsorship package designed to best suit your business needs.
